PROJECT WRITER/GRANT MANAGER	\$ 130.00	\$ 118.87	\$ 165.00	\$ 115.00
DATA MANAGER	\$ 95.00	\$ 99.60	\$ 165.00	\$ 150.00

As the County of Union has secured ICF for the purposes of documenting and reporting County damage and equipment use during Hurricane Helene under emergency/professional services for a fee,
As ICF has documented, tabulated, and reported damages received by Union County and started the FEMA reporting process through the first 120 day period ("Phase I"),
As a new contractor would unfamiliar with County data and processes, and would have to start the process from scratch, recreating all work already done by ICF,
As this would cause the incurrence of additional duplicative costs to Union County for the Phase I work, extend the time for formal reporting to FEMA, thereby possibly delay potential reimbursement,

The Evaluation Committee has determined that in the best value/interest for the tax payers of Union County, we select ICF to be awarded the FEMA consulting and reporting contractor bid, and continue documenting, reporting, and determining costs reimbursement for damages received from Hurricane Helene.
